🎓 Graduation: B.E. IT – 2026 | CGPA: 8.46 | No Backlogs

PROFESSIONAL SUMMARY

Final-year B.E. Information Technology (2026) student with strong foundations in data structures, algorithms, and software engineering. Solved 170+ Data Structures & Algorithms problems on LeetCode and built production-ready, end-to-end applications involving backend development, REST APIs, databases, Docker, and AWS cloud deployment. Comfortable with Python and Java programming, advanced SQL queries, and scalable system design. Actively seeking Specialist Programmer / Digital Specialist Engineer roles at Infosys.

TECHNICAL SKILLS

- **Programming:** Python (Advanced), Java (Core – DSA & backend logic), JavaScript, SQL (Advanced – Joins, Subqueries, Procedures)
- **Core CS:** Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks
- **Backend & APIs:** REST API Development, FastAPI, Flask, Node.js (basic), Authentication & API Integration
- **Machine Learning:** Supervised & Unsupervised Learning, Classification, Regression, Deep Learning (CNNs), Feature Engineering, Model Evaluation
- **Tools & Platforms:** Scikit-learn, TensorFlow, Keras, OpenCV, Pandas, NumPy, Docker, AWS EC2, Linux, Git, GitHub, CI/CD Concepts, PowerBI

PROJECTS

Food Spoilage Detection – Production-Ready AI Web Application

Tech: Python, TensorFlow, OpenCV, FastAPI, Docker, AWS EC2

- Built a CNN-based image classification system achieving 94% accuracy
- Designed end-to-end pipeline from preprocessing to cloud deployment
- Developed REST APIs for real-time inference using FastAPI
- Dockerized and deployed the application on AWS EC2
- [\[Live Demo\]](#) available showcasing real-time predictions.

US Visa Approval Prediction – End-to-End ML System

Tech: Python, Scikit-learn, FastAPI, Docker, AWS EC2

- Implemented complete ML workflow from data preprocessing to deployment
- Designed stateless REST APIs for real-time predictions
- Containerized and deployed application on AWS EC2
- [\[Live Demo\]](#) available showcasing real-time predictions.

Heart Attack Prediction System

- Logistic Regression model (~90% accuracy) with feature validation

INTERNSHIP EXPERIENCE

Machine Learning Intern – InternCertify

- Assisted in model validation, debugging, and API integration
- Worked in Agile environment using Git/GitHub

EDUCATION

- **B.E. Information Technology** – P.E.S. Modern College of Engineering, Pune (2023–2026) | CGPA: 8.46 | No Backlogs
- **Diploma in IT** – Govt. Polytechnic, Nanded | 88.25%

CERTIFICATIONS AND ACHIEVEMENTS

- **Career Essentials in Generative AI** – Microsoft & LinkedIn
- **Data Science and Analytics** - HP
- **Digital Skills: Artificial Intelligence** – Accenture
- **1st Rank** – MSBTE State-Level Paper Presentation (Blockchain)
